

## Interior Design & Fit-out

# Overview

We are interior design and fit-out professionals who understand that every project is unique and are dedicated to delivering personalised design solutions that exceed our clients' expectations. We take pride in completing complex refurbishment and new-build projects to a high standard, often within challenging timescales.

We take complete responsibility and accountability for all works on site, employing the best tradespeople and site labour for our interior projects. As creators of inspiring and functional designs, our team are experts in project managing full turnkey solutions, from concept to handover.

## Our Services

Creating the perfect space requires expertise in multiple areas and our full turnkey solution covers everything you need under one roof. We assist you from the initial concept, shell stages, through to the completed fully-functional workspace. This integrated solution includes a complete spatial planning and design service incorporating site surveys, lighting, power, HVAC, finishes schemes and computer-rendered visuals.

Our approach allows our customers to focus on other commitments while our team takes care of every aspect of the project. Our list of services includes:

- Interior design
- Spatial planning
- Fit-out
- Design and build
- Project management
- Refurbishment
- CDM and H&S management
- Furniture

Making your vision a reality

## Design

Our passion for design, wealth of technical knowledge and experience sets us apart in the industry.

Our interior design services include spatial planning, mood board creation, 3D visualisation and finishes schedules, ensuring that your space is designed to maximise functionality and aesthetics.

Visual

## 3D Visualisation

We can model your interior space in 3D to create stunning presentations, enabling you to step into your design scheme before the on-site work has even started.

Reality

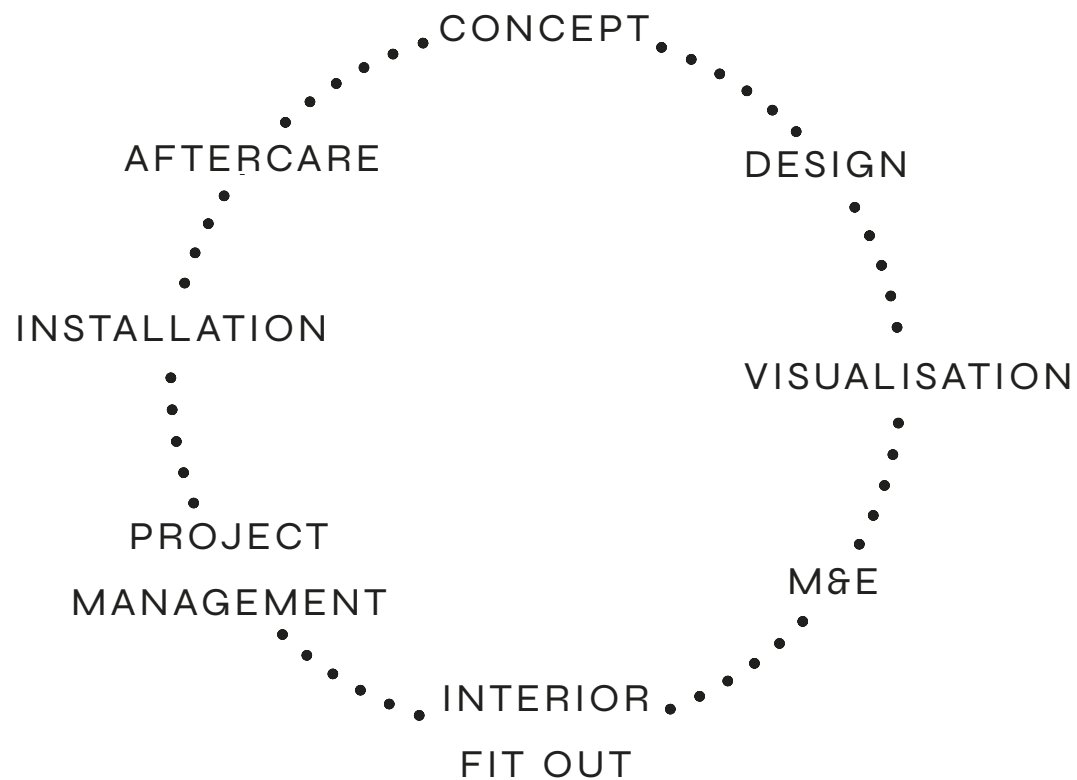

## VR and Animation

Once a 3D-modelled virtual environment has been created, we have the capability to immerse you in your space in a number of ways. One option is to create an animated walkthrough video, giving you a tour of the facility. Or, to take it one step further, using the latest in VR headset technology, you can now view, navigate and interact with your virtual space at your leisure.

# Project Management

Each client is assigned a dedicated Project Manager who oversees every aspect of the project. The team are skilled in project planning, CDM, health and safety, taking care of every detail, resulting in a seamless and stress-free experience from start to finish.

## Make your space stand out
